

Phase 1 Rubric (1)

Criteria	Ratings	Pts
Information Flow Diagram view longer description	Comments “Animal Detail” should have a bi-direction arrow to task “view and edit animal detail”. Like add vaccinations. Same applies between task and Database. “Animal Dashboard” forms should have a bi-direction to a task. As user can filter or sort animal data. Suggest rename “View Animal Dashboard” to “Retrieve/Filter/Sort Animal Data”. Miss the form and underlying task for user to register vaccination of the animal.	8.9 / 10 pts
EER Diagram view longer description	Comments There is a 1:1 relationship between “Animal” and “Approved Application”. Application that not approved doesn’t have a relationship between animal.	38.4 / 40 pts
Data Types view longer description	Comments good job	5 / 5 pts
Constraints view longer description	Comments good job	5 / 5 pts
Task Decomposition view longer description	Comments good job	10 / 10 pts
Abstract Code view longer description	Comments good job	30 / 30 pts
